### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the claimed apparatus and method including the features of a nematic liquid crystal between oppositely disposed faces with electrodes configured such that a first of a plurality of electrodes being able to rotate an orientation of a first electric field component and hence molecules of the liquid crystal material by a plurality of angles is considered not to be found in the prior art. The closest prior art is considered reference BB in view of reference CC, both cited by applicants, wherein the one skilled in the art would not be motivated to combine those to arrive at the claimed invention. The considered patentably distinct claimed features are found in each independent claims 1, 10, and 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other references cited by the examiner in this action represent the prior art relevant to the claimed invention.
